

Grow Sustainably with GS

A future Led by GS

GS continues to pioneer new businesses by organically bringing together the expertise and capabilities it has accumulated across diverse business areas.

Through relentless innovation and challenges, we will discover opportunities for growth and pave the way for a better life for our customers and a sustainable future.

The future with GS

CHAIRMAN'S VISION

We will lead the era of AI transformation and open the way to a sustainable future.

Launched in 2005 with the vision of "Respected & Value No. 1," GS Group is poised to take another leap forward.

Guided by our management philosophy of Dreaming of Tomorrow with Customers and Creating New Values in Life, we have built a world-class petroleum export business in the Republic of Korea, where not a single drop of crude oil is produced. We have also led the energy business that drives industry and developed distribution networks and construction infrastructure that improve quality of life.

Today, we stand at the center of the AI transformation era, a major turning point at which industrial and business paradigms are undergoing fundamental change. GS regards this moment as a new opportunity for change and challenge. Bringing together the strengths of GS Group, which has helped elevate Korea's industries from the barren landscape of the postwar years to a level recognized around the world today, we aim to drive new growth that leads the AI era. GS's journey of change and challenge has already begun. We continue to pursue innovation inspired by ideas from employees in the field while expanding our future businesses. We will demonstrate that our continued pursuit of change and challenge delivers tangible results.

At GS, innovation begins in the field where we engage with customers, with the ultimate goal of making people's lives better.
We invite you to look forward to the future GS Group will create.

Thank you.

GS Group Chairman

GS
MAKING AN INNOVATION ECOSYSTEM

GS has developed into a leading company in South Korea with its continuous innovation in response to the changing stream of times. From the energy that drives industry to distribution that enriches life as well as construction that presents new spatial potential, the path of GS has been the path to Korea's growth.

GS is going one step further and seeking future industries in order to create a more sustainable and eco-friendly virtuous cycle. GS is planning to create an ecosystem for future industries with like-minded partners, with the skills and potential that have already been proven from GS's major business sectors. Join us in this new ecosystem of this new ecosystem of future industries that will be created by GS's innovation DNA, which will help the ecosystem participants better capture the future opportunities as well as resolve the crises

AX
GS

We will lead the era of AI transformation

GS is pursuing AI Transformation (AX) to deliver unprecedented, higher-value solutions to customers and society amid a paradigm shift that is transforming existing technologies.

Above all, GS focuses on "implementation that actually works in the field." GS Caltex is improving process efficiency and economic performance through AI-based data analysis and optimization models at its Yeosu plant, while GS E&C is seeking to improve on-site safety and quality by introducing field-oriented AI technologies such as Physical AI. GS Retail is also innovating customer experiences across various channels through field-based AX and accumulating these experiences as valuable assets.

With the full support of its leadership, GS is embedding AI capabilities throughout the organization. Through its in-house AX platform "MISO," GS is creating an environment in which employees who know the field best can directly use data and AI to innovate their work, while strengthening collaboration with global AI companies and startups with unique technological capabilities.

GS will maximize human potential and work with its customers to build a smarter and more sustainable future.

OPEN GS

Creating Synergy Through a Flexible and Open Culture

GS is seeking solutions for sustainable growth by drawing on a flexible and open culture as a driving force, even amid rapidly changing markets and an uncertain business environment.

Above all, GS is responding to change by making its ways of working and decision-making processes more open and flexible, with its innovation organization "52g (5pen 2nnovation GS)" at the center of these efforts. Through 52g, employees of the holding company and affiliates collaborate with external partners across organizational boundaries to identify issues in the field and customer needs and propose practical solutions using digital technology.

This open and collaborative organizational culture is also leading to innovation in business operations. By collaborating with startups, GS is incorporating next-generation technologies into its core businesses, including energy and construction, to address technical and operational challenges in the field. GS is also working directly with promising startups in innovation laboratories, construction sites, and distribution and logistics centers to explore new business opportunities.

We will continue to respond to change and pursue opportunities for sustainable growth through open collaboration that transcends organizational boundaries.

ECO GS

Seeking Coexistence with Eco-Friendly Technology

GS believes that investing in eco-friendly technology is the best way to achieve sustainable growth.

To this end, we have set three major goals:
Reduce hazardous substances,
Improve business processes and consumer experiences, and
Innovate eco-friendly business models through advanced technology.

GS Entec has laid a new foundation for growth in the eco-friendly energy infrastructure sector by converting its existing chemical equipment manufacturing plant into a dedicated production facility for monopiles, which serve as substructures for offshore wind turbines. GS Wind Power, one of Korea's largest onshore wind power operators, is expanding the supply of clean energy through renewable energy supply agreements with global companies.

Our efforts to respond to climate change and prevent ecosystem destruction extend beyond the organization and its affiliates.

GS also actively invests in external startups and venture companies with eco-friendly technology.
GS will pursue sustainable growth with the unwavering principle of "Eco-Friendliness."

GS by the Numbers

☐ Based on the announcement by the Fair Trade Commission in 2026

TOTAL ASSETS

56.5 B USD

GS's total assets amount to USD 56.5 billion.
This is a remarkable growth compared to the total assets of 18.7 trillion won at the time of its separation from LG Group in 2005.

SALES

54.1 B USD

GS Group recorded annual sales of USD 54.1 billion. This represents over a threefold increase from 23 trillion won at the time of launch. GS has achieved solid performance through continuous business growth and innovative management strategies.

AFFILIATES

RANKING OF KOREAN COMPANIES

10th

As of 2025, GS ranked 10th among Korean business groups by total assets. GS, which has grown from a representative company in Korea to a company that the world is paying attention to, will continue to take on challenges.

SIZE OF THE WORLD'S SINGLE-SITE REFINERY

4th

The GS Caltex oil refinery in Yeosu is the world's fourth-largest single-site refinery. The plant can refine 800,000 barrels of crude oil per day and has an upgrading ratio of 34.4%.

1947

- **Established Lucky Chemical Industry (Parent of LG Group)**
- **Partnership between Man-Jung Huh (GS founder) and In-Hoe Goo (LG founder)**

Established Honam Oil Refining Co., Ltd. (GS Caltex)

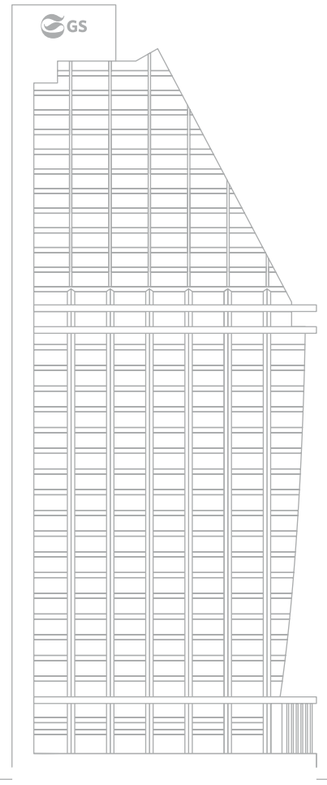

Established Lucky Development (GS E&C)

Established Geumseong Major Co., Ltd. (GS Retail)

Completed the construction of LG Gangnam Tower (GS Tower)

- April 13, 2004, Board of Directors of LG Co., Ltd.
- Resolved to split the company into manufacturing sector and distribution service sector.
- Resolved to establish a new holding company, GS Holdings Co., Ltd., by dividing the investment divisions in LG Distribution, LG Home Shopping, and LG Caltex Oil Refining.
- Resolved to spin off professional soccer team FC Seoul from LG Sports and launched GS Sports.
- Resolved to return LG Gangnam Tower to GS Holdings Co., Ltd. after the company split.
- LG Co., Ltd. Specialized in the 'manufacturing sector' with chemicals and electronics/information and communication businesses as the two main businesses.
- GS Holdings Co., Ltd. Specialized in the 'energy/ distribution service sector', such as distribution and oil refining.
- May 28, 2004, Extraordinary General Meeting of Shareholders Approved the division of the company to establish GS Holdings Co., Ltd. and the appointment of seven directors, including Chairman Chang-Soo Huh.
- July 1, 2004 Divided LG Co., Ltd. into LG Co., Ltd. and GS Holdings Co., Ltd.

GS IS TAKING A LEAP FORWARD AS A COMPANY REPRESENTING KOREA

2005

- **Establishment of GS Holdings**
- **Inauguration of Chairman Chang-Soo Huh**

Separation of GS Holdings and 13 other companies approved (FTC). Declare CI and management philosophy

Established vision of 'Value No.1 GS'

Acquired shares of Ssangyong Co., Ltd. (GS Global)

Held the 'GS Win-Win Cooperation and Fair Trade Agreement Ceremony' with the participation of 9 affiliates and 1,000 partner companies

- Completed the second heavy oil decomposition facility.
- Completed the Base Oil plant.
- Launched a premium gasoline 'Kixx PRIME'
- Expanded to China and India.
- Launched the GS Caltex Foundation.

GS Retail

- Introduced 'Delivery Management System (TMS)' for the first time in the convenience store industry.
- Introduced video conferencing for the first time in the distribution industry.
- Gold Tower Order of Industrial Service Merit from Korea Logistics Awards
- Grand Prize in Customer Satisfaction Management Awards
- Launched product sales data broadcasting T-commerce.
- Launched mobile shopping M-Commerce.
- Launched the smartphone shopping app 'Mobile GS SHOP'.

GS E&C

- First in the domestic construction industry to obtain CMMI Level 4 certification under the International IT System Quality Evaluation Standard.
- Most Trusted Company Award hosted by Korea Management Association
- A world company in the Dow Jones Sustainability Index (DJSI).

2010

- **Established a new brand identity and announced its brand slogan, 'Grow with uS, GS.'**

Established GS Energy, an energy-specialized business company, through physical division

Acquired STX Energy (GS E&R)

GS Caltex

- Completed the 3rd and 4th heavy oil decomposition facilities.
- Expanded into the Czech Republic and Mexico.
- Declared the vision of 'Value No. 1 Energy & Chemical Partner'.
- Opened Yeosu Culture and Arts Park 'GS Caltex Yeulmaru'

GS Retail

- No. 1 in customer satisfaction in Korean industry
- Received the Presidential Award at the 20th Korea Distribution Awards (2015)
- Opened the first GS25 store in Vietnam.
- Achieved the highest number of GS25 convenience stores in Korea.

GS Homeshopping

- First domestic home-shopping company to surpass 3 trillion won in handling volume.
- Awarded with USD 5 MILLION & 10 MILLION Export Tower Prize for the first time in distribution sector
- No. 1 in the home-shopping category of the National Customer Satisfaction Index (NCSI)

GS E&C

- Acquired Inima in Spain.
- Received orders for overseas projects in Iraq, Kuwait, Singapore, and the United Arab Emirates.
- Achieved '1 trillion won in operating profit' for GS E&C.

2020

- **Inauguration of Chairman Tae-Soo Huh**
- **Declare "Strengthening digital capabilities and eco-friendly management"**

Established GS Futures, GS Ventures a corporate venture capital (CVC)

Launched the open innovation community '52g'

Formed a GS ESG council and had CGOs (Chief Green Officers) participated from each affiliate

Established GS AI Infra and entered the AI data center business

GS Caltex

- Completed MFC (Olefin production facility).
- DAX, Evolving into an intelligent organization by combining digital capabilities with AI
- Established the first 'Convergence Energy Station' in Seoul.
- Unveiled future gas station models participating in CES 2021.
- Ranked 1st in the National Customer Satisfaction Index (NCSI) gas station category for 15 consecutive years

GS Retail

- Merged GS Retail and GS Home Shopping and launched integrated GS Retail.
- Opened its 200th GS25 store in Vietnam and 100th GS25 store in Mongolia.

GS E&C

- Acquired Danwood S.A. (Poland) and Elements Europe Ltd. (UK).specialiged in modular construction.
- Received an order for a seawater desalination project in Oman.
- Opened the New Selander Bridge in Tanzania.

GS Energy

- GS Power: Bucheon Combined Heat and Power Plant Modernization Project
- Acquisition of GS Chargev

GS E&R

- GS Wind Power operates wind farms with a total capacity of 126 MW.

GS Global

- GS Entec completed the conversion of its Yongjam plant into a dedicated monopile production facility.

GS Affiliates Are Creating Better Life Values for Customers Across Their Business Areas

GS Business Areas

FUTURE VISION & HIGHLIGHT

From Green Energy to the AI Industry
Creating future growth engines

GS has continued to grow by creating value and delivering memorable experiences close to its customers' everyday lives.

GS is also pursuing a systematic transition toward eco-friendly and future industries, building on its major business areas, including oil refining, energy, retail, and construction.

GS is developing phased strategies for various new businesses it is pursuing, taking into account their connections with its existing businesses. Building on the solid competitiveness of its core businesses and expanding into new eco-friendly businesses, GS is creating a cleaner and more sustainable tomorrow.

Here, we introduce GS's business areas, history, achievements, and affiliates.

GS Caltex

GS Energy

GS Power

GS EPS

GS Sports

GS E&C

GS Global

GS Caltex

Refining & Chemicals

Expanding Future Possibilities Through Competitiveness in Energy and Chemicals

GS has strengthened its global competitiveness by building a business portfolio spanning oil refining, petrochemicals, and lubricants, backed by world-class production facilities and technological expertise. Furthermore, in line with the transition to low-carbon energy, GS is expanding into future growth businesses, including biofuels and eco-friendly materials.

GS Caltex, a major GS affiliate, produces high-quality petroleum products at its Yeosu refinery, which has a crude oil refining capacity of 800,000 barrels per day, and exports them to approximately 50 countries worldwide. GS Caltex is also transforming its gas stations into future energy and mobility hubs while leading the energy transition through initiatives such as becoming the first Korean oil refiner to commercially export sustainable aviation fuel (SAF) to Japan.

Building on its accumulated technological expertise and know-how, GS is also expanding into advanced industries, including AI data centers. GS is strengthening its competitiveness in next-generation cooling technologies by launching Korea's first immersion cooling fluid for data centers and introducing direct liquid cooling fluids that control heat generated by high-performance servers. In the resource circulation sector, GS has also achieved milestones such as commercializing products made with waste plastic pyrolysis oil and becoming the first in Asia to obtain international certification covering the entire process of recycling plastics from end-of-life vehicles.

GS will continue to achieve sustainable growth by focusing on strengthening its competitiveness in new refining and chemical businesses and the bio value chain.

GS Energy GS Power GS EPS GS E&R

Energy & Power

GS Powers the World with Safe, Clean Energy

Building on its utility infrastructure capabilities, which have supported the national power grid and the foundation of industry, GS's Energy & Power business is evolving toward sustainable, smart power infrastructure by combining digital transformation with eco-friendly technologies. GS is leading the future energy market by developing a virtual power plant (VPP) ecosystem that connects distributed eco-friendly energy resources through digital technology and driving the modernization of conventional power infrastructure through smart technologies.

Led by GS Energy, a key affiliate, GS provides EV charging solutions spanning energy supply to charging services. Through its subsidiary GS Wind Power, GS E&R has commercialized an AI-based "Wind Power Generation Forecasting Solution." The solution achieved an industry-first single-digit error rate (below 10%), improving the profitability of power producers and making a significant contribution to the stability of renewable electricity supply and demand in the national power grid.

In addition, GS is expanding its VPP platform capabilities to collect and analyze real-time data from various distributed energy resources, including solar power, wind power, demand response resources, batteries, and EV chargers. By optimizing electricity supply and demand and fostering a global smart energy ecosystem through open innovation, GS is leading the sustainable energy and power generation industry.

GS will continue to strengthen its smart power solutions, spanning electricity generation, energy management, charging infrastructure, and VPP platforms, to build a clean and stable power ecosystem for the future.

GS Retail Parnas Hotel GS Sports

Retail & Service

GS Adds Value to Everyday Life and Connects Lives

GS's retail and service businesses deliver exceptional value and convenience throughout customers' daily lives, drawing on Korea's leading online and offline commerce network and hospitality capabilities encompassing five-star luxury hotels and premium residences.

GS25, operated by GS Retail, a major GS affiliate, is expanding the reach of K-retail worldwide through its private brands and an increasing number of stores with enhanced fresh food offerings. GS THE FRESH, its supermarket chain, leads the industry with a diverse selection of fresh products and friendly service. GS Retail has also launched the "Our Neighborhood GS" mobile app, combining the strengths of GS25 and GS THE FRESH to offer a differentiated level of convenience that seamlessly connects in-store shopping with delivery and pickup services. GS SHOP, which encompasses TV home shopping and mobile commerce, is also creating next-generation shopping experiences.

GS P&L, a holding company specializing in hospitality, is building a comprehensive service ecosystem centered on Parnas Hotel, encompassing premium accommodation, culture, and life care. It is also expanding into high-end senior life care with the introduction of "Soyo Hannam by Parnas," a premium senior residence that brings five-star hotel service expertise to residential spaces.

GS's Retail & Service business connects every moment of the customer experience, from a convenience store stop on the morning commute to evening grocery shopping, TV and mobile shopping, and premium hospitality services. Building on accumulated data and a deep understanding of our customers, we will continue to be their most trusted partner in everyday life.

GS E&C GS Global

Construction & Infrastructure

Building Tomorrow by Creating Value Through Spaces

GS has developed living spaces and industrial infrastructure for people, both in the Republic of Korea and around the world.

GS E&C is strengthening its competitiveness by developing major infrastructure and industrial facilities at home and abroad while leading residential culture through its premium housing brand, "Xi." In particular, GS E&C is advancing modular construction technology, in which major structural components are prefabricated in factories and assembled on-site, and promoting construction automation using AI and robotics. GS E&C will continue its efforts to expand the adoption of smart construction technologies, including quality inspections of plant equipment using augmented reality (AR) and the establishment of a construction robot pre-verification center.

GS Global is also expanding its presence by identifying business opportunities in various fields, including energy and industrial materials trading, overseas resource development, and infrastructure projects, drawing on its global business network.

GS Entec, a subsidiary of GS Global, has become Korea's first and only monopile manufacturer, building on its longstanding expertise and technological capabilities in industrial equipment manufacturing. Through continued investment in facilities and efforts to strengthen its technological competitiveness, the company is opening up new possibilities for the future energy industry.

We will continue to add new value to living spaces and industrial infrastructure for humanity, creating a better and more prosperous tomorrow.

Beyond Business

GS Is Building a Sustainable Tomorrow with Innovation as Its Growth Engine

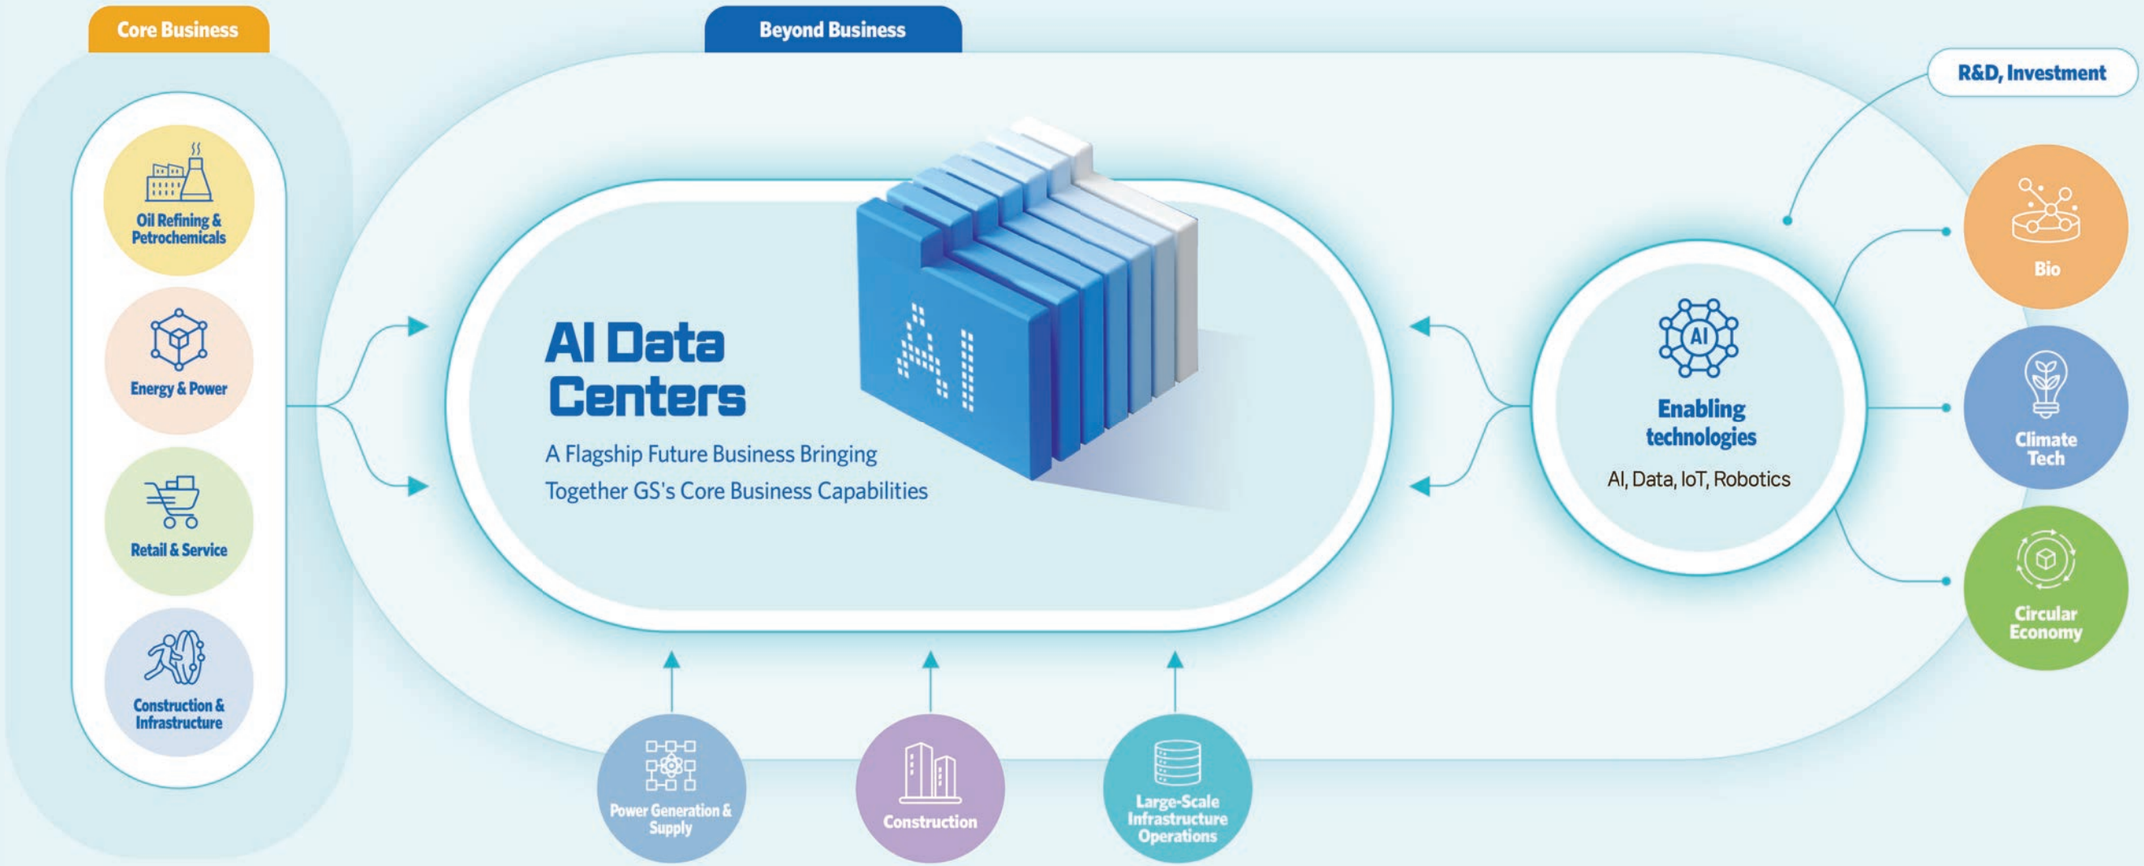

The future innovation ecosystem envisioned by GS includes a variety of new businesses in AI & Digital, Bio Tech, Climate Tech, and Circular Economy. Building on the competitiveness and know-how accumulated over more than half a century in its core businesses, including energy, distribution, and construction, GS is identifying future growth engines beyond the boundaries of its existing businesses.

In particular, GS has identified AI data centers as a core future business and is concentrating its company-wide capabilities on this area. By bringing together the expertise of our affiliates, from power generation and energy supply to the development, construction, and operation of large-scale infrastructure, we plan to build the critical infrastructure for the AI industry. Through these efforts, we aim to strengthen the competitiveness of our existing businesses while contributing to the growth and global competitiveness of Korea's AI industry.

We also continue to invest in R&D and new technologies. In Bio Tech, we are exploring business opportunities in bio-based materials and industrial biomanufacturing technologies, while focusing on next-generation energy technologies in Climate Tech. In Circular Economy, we are fostering resource recycling technologies, including battery and waste plastic recycling. In addition, we are accelerating business innovation by incorporating advanced enabling technologies such as AI, data, cloud computing, IoT, robotics, and blockchain across all these areas.

To this end, GS has established GS Ventures and GS Futures as its corporate venture capital (CVC) firms and is identifying promising startups in Korea and overseas. We are also creating an innovation ecosystem that spans investment, technology validation, and commercialization in collaboration with new business teams across our affiliates.

We will continue to organically combine the business capabilities of our affiliates with innovative technologies from external partners to create new value and drive sustainable growth into the future.

A COMPREHENSIVE ENERGY COMPANY LEADING THE GLOBAL ENERGY BUSINESS

GS Caltex

GS Caltex started as Korea's first private oil refining company and has been exporting products such as refined oil, petrochemicals, and lubricants to 50 countries around the world with advanced technology and differentiated quality. To respond to future environmental changes, GS Caltex is expanding its energy business by entering the olefin business and transforming its gas stations into future energy mobility hubs. The company is also making various efforts to prepare for the future by reducing carbon emissions in its existing businesses and strengthening new low-carbon businesses.

www.gscaltex.com

Scan the QR code to find more detailed information.

GS Caltex has a crude oil refining capacity of 800,000 barrels per day and one of Korea's largest upgrading facilities. Through the successful operation of its MFC (Mixed Feed Cracker) and HDPE (High Density Polyethylene) plants, the company produces a wide range of products backed by exceptional technology and competitiveness, including high-quality petroleum products, aromatics, lubricants, olefins, and polyethylene.

Oil Refining

Producing high-quality petroleum products using state-of-the-art automated production facilities, including a crude oil refinery with a capacity of 800,000 barrels per day and gasoline and diesel desulfurization units.

Aromatics

Having world-class annual production capacity of 2.8 million tons of aromatics (paraxylene, benzene, toluene, and xylene).

Olefins

Producing 900,000 tons of high-quality ethylene annually through the successful operation of the MFC project.

Polymers

Supplying high-quality polyethylene, polypropylene, and compounded resins based on advanced technological capabilities.

Base Oil

Producing eco-friendly, high-quality base oil using state-of-the-art processes.

Lubricants

Leading Korea's lubricant market with a finished lubricant production capacity of 9,000 barrels per day.

AN ENERGY SOLUTION COMPANY LEADING THE PARADIGM SHIFT

GS Energy

As a holding company specializing in energy, GS Energy has established itself as a comprehensive energy solutions company leading the energy paradigm shift, with the aim of improving the quality of human life and contributing to environmental improvement. GS Energy is further strengthening its global LNG value chain through resource development projects centered on the Middle East, oil refining and petrochemical businesses, and businesses ranging from direct LNG imports to the development and operation of LNG receiving terminals in Korea. In addition, the company is creating synergies with its existing energy businesses by establishing a closed-loop system encompassing electric vehicle charging (GS Chargev) and used battery recycling, while focusing on renewable energy, smart power solutions, and clean hydrogen businesses.

www.gsenergy.co.kr

A WORLD-CLASS ECO-FRIENDLY ENERGY COMPANY LEADING A BRIGHT AND WARM FUTURE

GS Power

GS Power is a comprehensive energy company that is leading the way in saving energy and improving the convenience of people's lives by supplying clean electricity and warm district heating. We operate a natural-gas-combined thermal power plant with a capacity of 1,430 MW, producing electricity and heat to supply heat, through a district cooling and heating system, to approximately 400,000 households in Anyang and Bucheon areas, as well as supplying high-quality electricity to the capital area.
